Packing

Each unit of eeZeeBAR™ (500 g net) contains 9 bars in grease-proof paper. Each 55.6 g bar is compressed into two tablets. The 9 bars are protected by vacuum packing in a 3 layer laminated alu-foil bag.

24 units of eeZeeBAR™ are packed in a strong corrugated board carton (12.0 kg net, 13.0 kg gross, 0.0159 m³). 55 cartons are packed on a one way europallet and shrink-wrapped on request (660 kg net). A 20' container holds 1500 cartons eeZeeBAR™, equivalent to 18.000 kg net.

Shelf Life

Minimum 4 years from date of production when stored at warehouse conditions. A minor decrease in the level of some of the vitamins can occur depending on time and temperature of storage. After opening the alu-foil bag, eeZeeBAR™ should be used within 1-2 weeks.

Label

Standard languages on the bags are English and French. Pictogram explains the usage.

Health Certificate

Health certificate from the Norwegian Health Authority is available on request.
